

## ***Baltic solutions for renewable energy and sustainable transport***

### ***- Initiatives for blue and green growth***

**15 June 2015**

**Venue: Goethe-Institute Brussels, Rue Belliard 58, 1040 Brussels**

*Moderator: Richard Tuffs, Director of the ERRIN network(tbc)*

**Introduction:** New energy and climate targets for 2030 were established by the European Union last year. The energy transition in Europe has to rapidly pick up speed. The corporate and private sectors face massive changes in the energy supply and demand chains, e.g. in the energy mix and the transport sector. What does this mean for the Baltic Sea Region? How are the main challenges addressed and how can obstacles be overcome? The iBSG will present strategies, best practices and concrete examples of implementation from regions around the Baltic Sea, focusing on major bottlenecks and smart solutions in the sectors of renewable energies and sustainable transport.

### ***Project café for Practitioners***

This interactive session will showcase current good practices and examples of on-going cooperation activities. It will also provide an opportunity to learn more about funding opportunities and to engage in ongoing and possible upcoming cooperation activities.

**11.00 Welcome to the project café**

**11:05** *Moderator presents today's program and participant expectations*

**11.30 Warm-up session**

**11.50** Project village - experience exchange, networking, finding new partners?

**13:00** Lunch

***Seminar on renewable energy and sustainable transport in the Baltic Sea Area***

**13.30** Registration for the Seminar

**14:00** **Session 1: Renewable Energy**

**15:30** Coffee Break

**16:00** **Session 2: Sustainable Transport**

**17:30** **Panel discussion and Q&A: Input and feedback from practitioners in the project café**

**18:00** **Baltic Reception including Dinner Buffet**
